Prices are ex-works and are subject to delivery charges and the VAT rate applicable at the date of supply.

Canopies are easily fitted to vehicles by your distributor. Please consult your local distributor for prices. Fitting the canopy to some models may require drilling into the vehicle (or load-liner).

Vehicles with load liners

The presence of a load liner on a vehicle may impair the fitting of a canopy. Load liners are generally manufactured by a third party and not the vehicle manufacturer, this had led to a huge variation in styles being available. It would be impractical for us to accommodate these within our design, therefore it is the users' responsibility to either modify or remove the load liner to allow for canopy fitting. An under rail load liner is recommended.

Pick-up canopies have been designed for UK models only and may not be suitable for imported vehicles.

Legal disclaimer - cab mounted stop light

When fitting a canopy to any vehicle equipped with a cab mounted rear stop light the light MUST be permanently disabled. If this must be disabled in accordance with any statutory or health and safety requirement it must be disabled in such a way as to comply with all relevant legislation. If in doubt please consult your vehicle manufacturer for the correct method of disabling the lamp. Ifor Williams Trailers Ltd accepts no responsibility whatsoever for loss or damage resulting from any modifications carried out on the vehicle including the disabling of the stop or other lights, obscuring it/them or any damage caused to it/them or the vehicle or loss of value suffered in respect of it/them or the vehicle by the fitting of the canopy.

Product design, descriptions, colours, specifications etc. correct at time of going to press. We constantly strive to improve our products, and from time to time this may result in changes to our range or to individual models. Please check that design, description, colours, specifications described in this brochure are still valid at the time of placing an order.

CANOPIES

BRITAIN'S LEADING
TRAILER MANUFACTURER

CANOPIES

Since 1958, people have put their trust in our trailers, just ask an owner - they're not difficult to find.

As specialists in trailer design and engineering, we have continued to set the standard both in the UK and throughout much of Europe. We are an independent company with one focus: to build the best products on the market. More than 30,000 people choose our products each year - but we're not standing still. Our dedicated investment in new technologies and materials ensures that our products continue to exceed the expectations of our customers. We know that quality, strength, value and ease of maintenance are of vital importance to you. That's why we've made them the driving force behind everything we do.

If for Williams Canopies are produced from the same high strength, durable materials as our trailers – high grade aluminium for the framework and panels, and hot dip galvanised steel for the tailgate and hinges.

They are designed and built to take the inevitable rough treatment they are subjected to in farming and construction environments. Tailgates are panelled either in galvanized steel weld mesh or 2mm thick aluminium with optional toughened glass window.

GD85 Canopy

A selection of our general duty and unbraked trailers are offered with optional canopies. They are available to order with your new trailer or can be purchased and fitted to an existing trailer. Canopies can double the versatility of your trailers, conceal your trailer load, increase load security when travelling and can provide a degree of weather protection.

Canopies for trailers with a tailboard are offered with the option of a meshgate or aluminium door. Trailers with a ramp option will have an approximate gap of 200mm between the top of the ramp and roof of the canopy.

Trailer canopies with an aluminium door with window also have a window in the front panel of the canopy. Those supplied with an aluminium door without a window have no window in the front panel.

Please note the headroom on a GD fitted with a canopy that has a rear ramp is 1440mm and with a tailboard is 800mm.

P6e Canopy for Livestock model

Land Rover Defender 90 Single cab with meshgate

So that we can offer increased flexibility to our customers, each canopy model is offered with a rear meshgate, aluminium door with window or an aluminium door without a window.

Our customer base is extensive with canopies being used by a diverse range of people and businesses. Some of our customers include garages, farmers, vets, tradesmen, tree surgeons, safari

parks, leisure parks and estates. Canopies are also popular with the domestic user who is looking for additional flexibility from their Pick-up vehicle at an affordable price.

We offer an extensive range of pick-up canopies for popular models from leading manufacturers. Your local Ifor Williams distributor can advise you on your canopy selection.

PICK-UP CANOPIES

Ifor Williams Canopies are strong, tough, built to last and are exceptional value for money. That's why thousands of pick-up owners buy our canopies every year.

A versatile side access door is available for most pick-up and trailer canopies. The door can be fitted to the drivers' side or passenger's side between any of the roof channels.

Convenient gas strut assistors are available for most pick-up canopy models. These make the operation of the rear tailgate very convenient. Also available as an accessory on most pickup models with aluminium tailgates is a handy lock.*

*The lock does not secure the vehicle tailgate.
